Strauss Immune Support Drops™

Did You Know?

The design of our immune system is complex and influenced by an ideal balance of many factors, not just diet, and especially not by any one specific food or nutrient. However, a balanced diet consisting of a range of vitamins and minerals, combined with healthy lifestyle factors like adequate sleep, proper gut health, exercise and low stress, most effectively primes the body to fight infection and disease.

What factors can depress our immune system?

- Older age
- Environmental toxins
- Excess weight
- Poor diet
- Chronic diseases
- Chronic mental stress
- Lack of sleep and rest

8 Steps to Help Support a Healthy Immune System

1. Eat a balanced diet
2. If a balanced diet is not readily accessible, taking herbals and a multivitamin can help
3. Don't smoke or quit if you do
4. Drink alcohol in moderation
5. Perform moderate regular exercise
6. Aim for 7-9 hours of sleep nightly
7. Aim to manage stress
8. Wash hands throughout the day

Usage: Shake well. As a dietary supplement, adults take 1 ml orally 3 times daily as indicated on the graduated dropper.
